

CBF-2000 Fully Automatic Side Sealing Liquid Packaging Machine

Product Introduction

In the ever-evolving landscape of packaging technology, stability and reliability are the cornerstones of success. This CBF-2000 Fully Automatic side sealing liquid filling machine is a high-precision filling equipment designed specifically for liquid products. It adopts advanced side sealing technology to ensure excellent packaging sealing, while also considering efficient production and convenient operation. With its stable performance, low failure rate, and easy to maintain design, this device has become the preferred choice for many enterprises worldwide

Packaging materials

It can be widely used for filling all kinds of drinks, juice milk, peanut milk, soy sauce, vinegar, edible oil and other liquid materials. The machine adopts three side sealing, the bag shape is beautiful and elegant, and the sealing is firm. It is the preferred equipment for packing liquid materials.

Service and Cooperation Commitment

We offer:

Customized solution - flexibly
configure equipment according to
customer production capacity and
packaging needs.

Global technical support -
24-hour online response, localized
after-sales team ensures worry free
operation.

Full stack service - one-stop
service from installation and
debugging to employee training.

Co create the future

Whether you are a startup or a large manufacturer, our side sealing liquid filling machine will help you enhance your competitiveness with excellent performance and extremely low maintenance costs. Welcome to contact us for case videos or to schedule a trial run. We look forward to working with you!
