

## *KY-8A/8B Irregular Bag Filling And Sealing Machine*

This Machine is designed to deliver unmatched stability and efficiency, making it an indispensable tool for filling businesses worldwide. Renowned for its robust performance, this machine ensures consistent and precise filling, coupled with reliable sealing, to meet the highest industry standards. Its compact and lightweight design not only saves valuable floor space but also simplifies maintenance, ensuring minimal downtime and maximum productivity.

## *Serving For Global Clients*

This machine trusted by numerous global clients, It has garnered widespread acclaim for its ability to streamline operations and enhance output. Whether you're handling pure water, juice, milk or other liquid, our Pouch Filling and Sealing Machine is engineered to boost your

合肥宇成机械制造有限公司  
HEFEI YUCHENG MACHINERY CO., LTD

production efficiency while maintaining exceptional quality.

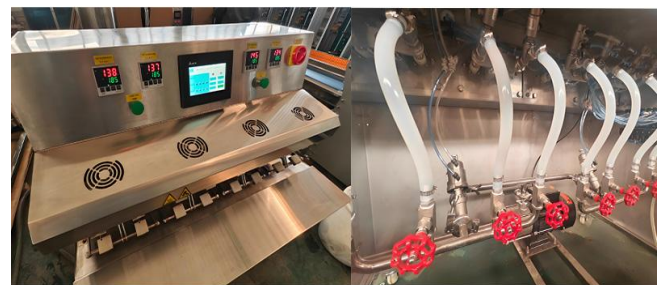

## *Machine Construction*

This machine includes a touch screen, PLC computer system, displays in both Chinese and English, and is equipped with pneumatic components for automatic control.

Just press the button to operate. Adjusting measurements by changing the numbers on the touch screen through buttons is easy to operate and accurate.

At the same time, a special pressure filling pump is used for feeding,

eliminating the disadvantages of low feeding efficiency and high air consumption of the plug pump. For difficult to seal formed bags, in addition to the traditional temperature control system, we have also added a time adjustment system. And the nozzle of the machine adopts a special design to ensure consistent sealing.

### *Contact Us Today*

Don' t miss the opportunity to enhance your packaging process with a machine that has already earned the trust of so many. Reach out to us today to learn more, schedule a demonstration, or discuss your specific needs. We look forward to hearing from both new and returning customers and helping you achieve your production goals with our industry-leading packaging solution.

**If you purchase our machine, we can make the following guarantees**

1. We can dispatch engineers to provide on-site installation and debugging, and ensure that your company's employees can learn to operate the machine on their own
2. We will provide you with corresponding parts at the same time of shipment, so that you can replace them later
3. We can also provide remote technical support in the later stage, and if there are any technical problems, we will solve them for you as soon as possible
4. If you have requirements for packaging speed, width of packaging bags, and other technical parameters, we can design a liquid packaging machine that meets your needs according to your requirements, Your success is our priority. Let' s grow together!
